Cloud-power IT and employees with ChromeOS

A mobile, secure, easy-to-manage operating system for modern ways of working

Key benefits of deploying ChromeOS for your business:

Fast deployment and simple management

Managed ChromeOS devices see a 76% time savings during deployment compared to Windows devices[1]. IT gains access to 500+ device policies, fleet oversight capabilities, and managed updates, all from the cloud-based Google Admin console or third-party UEM solution.

Apps for every worker

ChromeOS gives access to your employees' favorite productivity suites and video conferencing apps. Download and run Android apps from the Google Play Store, and access Windows apps through VDI or Parallels Desktop. Look for the Chrome Enterprise Recommended badge for verified apps optimized for ChromeOS.

Modern employee experience

Experience high-performance devices that boot up fast and don't slow down over time. Quickly log in to any device and pick up where you left off with cloud profiles. Updates install in the background, and you can work from anywhere, on any ChromeOS device.

Built-in, proactive security

ChromeOS provides IT with advanced security controls. If an end user misplaces their Chromebook, IT can easily disable the device, protecting corporate data. Devices can also be set as ephemeral, removing user data from the device at the end of a session.

A smart and eco-friendly investment

Switch to Chromebooks and see $482[2] in savings per device per year from reduced deployment, upgrade, and training costs. Chromebooks use up to 46% less energy[3] to lower your device carbon footprint and are made with sustainable and recyclable materials.

> "
>
> At Sunrun, we have deployed ChromeOS devices to help simplify workflows for employees across the company. With Parallels Desktop for Chromebook Enterprise, we can now provide our employees with quick access to the legacy apps they need locally. This ensures our entire business can transition to ChromeOS and be more productive and secure."

Explore ChromeOS devices at chromeenterprise.google/devices

Lenovo ThinkPad 13 Chromebook Enterprise

Dell Latitude 7410 Chromebook Enterprise

HP Elite c1030 Chromebook Enterprise

Acer Chromebook Enterprise Spin 713

Asus Chromebox Enterprise 4

Samsung Galaxy Chromebook 2

To unlock all the built-in capabilities of ChromeOS for your business, purchase ChromeOS Enterprise devices or purchase Chrome Enterprise Upgrade and attach it to your existing devices.

An OS that allows your entire team to do their best work—from anywhere

Supports every employee:

Information workers like financial analysts, marketing, and sales

Field or mobile workers like real estate agents, agricultural field workers, and technicians

Front-of-house workers like hotel receptionists and virtual healthcare providers

Back-of-house workers like training teams, managers, and office admins

Contact center workers like customer experience representatives

Great for:

Cloud-based work
Gain cloud-working benefits with a ChromeOS device, Google Cloud or third-party identity, and cloud-based apps.

Remote work
Employees can be productive and IT can manage the entire fleet of ChromeOS devices from any location.

Customer self-service
Set up secure, purpose-built kiosks to simplify customer processes and reduce wait times for faster check-ins.

Video conferencing
Employees can securely access industry-leading video conferencing tools that keep them connected and productive.

Thin client replacement
Virtualization solutions allows employees to access legacy apps while migrating towards the future of work with ChromeOS.
