| 7. 2 nd entry | 6% if paper-based, N/A if electronic data collection | - |
| 8. Operational reporting | Yes | - |

Comments

(1) Decision to move to 12 month PDM for Zambia given difficulties reaching agreement with one of several organisations on acceptable cost for the PDM implementation. The discussions we had with the leading potential PDM partner left us with some reservations about a partnership and we agreed to carry out a single PDM as a pilot rather than award a full life-cycle PDM contract. We were happy with way the partner carried out the PDM, their communication with us during the process and the flexibility they showed on several occasions and have now awarded the remainder of the PDM contract to them.
