

LIST OF TITLES — SEPTEMBER 2024

Clinical Consensus documents provide recommendations on focused clinical issues based on a careful examination of available scientific data, supplemented with expert opinion when the evidence is limited.

Committee Opinions provide ACOG committee assessments of emerging issues in obstetric and gynecologic practice.

Committee Statements address issues related to the practice of obstetrics and gynecology, such as ethics and access to care for underserved populations.

Clinical Practice Guidelines provide clinical management recommendations that are developed through assessment of the benefits and harms of care options based on a systematic review of the evidence.

Practice Bulletins are evidence-based documents that summarize current information on techniques and clinical management issues for the practice of obstetrics and gynecology.

Obstetric Care Consensus documents are developed jointly with the Society for Maternal-Fetal Medicine and include high-quality, consistent, and concise clinical recommendations for practicing obstetricians and maternal-fetal medicine subspecialists.

Technology Assessments provide an overview of technology in obstetrics and gynecology.

ACOG documents are reviewed routinely for accuracy and continued relevance. The “reaffirmed date” in the list below indicates when the document was last reviewed.

No titles have been withdrawn from circulation this month.
