

SAFETRX PROTECT

KEY BENEFITS:

- Protect your workers welfare wherever they are
- Optimal workforce management
- Early intervention to critical events
- Secure-by-design feature with end-to-end data encryption and locked down wearable
- Smart alert monitoring based with a range of biometric, gesture, push button and positional alarms
- A global roaming profile ensures the wearable is continuously connected so no need for pairing with a phone

FEATURES:

- The SafeTrx Protect app on the mSafety wearable from Sony with rules-based dashboards, alerts & secure two-way messaging provides continuous tracking and alerting
- Configurable wearable application with integration to other BLE sensors
- Automatic background tracking and alerting on a robust, lightweight and discrete wearable form factor

TECHNOLOGY:

- Low power IoT connectivity – long range
- Secure end to end
- Smart monitoring
- Flexible configuration

INTEGRATION:

- Integrates with Enterprise systems
- Integrates with other IoT assets

SAFETRX CARE

DISCREET REMOTE MONITORING

SafeTrx Care is a highly flexible system that connects wearable and home sensors to a safety monitoring platform, to allow people to live independently with the reassurance that help is at hand when needed.

Wearable

Room movement sensor

Light, temperature and humidity sensor

Medicine cabinet door sensor

Flexible configuration and ease of adding devices means you can provide deep reassurance and protection to those who need it.

Compatible with most smart home devices

KEY BENEFITS:

- The SafeTrx Care platform combines wearable and autonomous home activity IoT sensors, in one easy-to-use system
- A complete independent-living solution which can adapt with the individuals as their needs change
- Allows individuals to continue to live their life as they choose, with the peace of mind that comes with knowing help is at hand
- Integration with wearable BLE accessories such as SpO2, blood pressure and fall prevention sensors
- Integration with major IoT solutions such as Samsung SmartThings and Alexa
- Built-in fall detection

FEATURES:

- SafeTrx Care app on the advanced mSafety wearable from Sony which is remotely configurable to adapt to each case
- iOS and Android versions of SafeTrx Care app also available
- Discrete activity detection, step counting, energy expenditure, heart rate, heart rate variability (rMSSD), location tracking options
- SafeTrx Smart Home connects to major IoT platforms
- SafeTrx C2 rules based dashboards, alerts and two way messaging
- Secure end to end communication
- Cloud based and on-prem deployment options

TECHNOLOGY:

- Market-leading IoT wearable technology with LTE-M connectivity, security and multi-day battery life
- Open architecture allowing integration of wearable BLE technology or other IoT devices
- Flexible configuration

INTEGRATION:

- Integrates with Healthcare systems
- Integrates with IoT sensors
- Integrates with other IoT platforms

SAFETRX

ACTIVE

KEY BENEFITS:

- A dedicated safety wearable with long range tracking and alerting and exceptional battery life
- Takes the search out of search and rescue
- Lightweight
- IP68
- Fully compatible with SafeTrx Classic systems
- No need for a smartphone
- Always connected
- Built on proven SafeTrx architecture

FEATURES:

- Health & Safety monitoring
- Tracking and alerting
- Manual and automated alerts
- Fall detection
- 2-way messaging
- 5G LTE-M

TECHNOLOGY:

- Low power IoT connectivity – long range
- Secure end to end
- Smart monitoring
- Flexible configuration

INTEGRATION:

- Full integration with SafeTrx Classic in use in 11 countries
- Compatible with existing SafeTrx smartphone app
